PLAIN PET ACOUSTIC PANELS

PLAIN ACOUSTIC

PANEL: The plain acoustic panel is a new kind of sound absorption material made of 100% polyester fiber through high-technology heat and fusion in the form of coccan cotton with different degree of air permeability and density. A palette more of 45 colors are available.

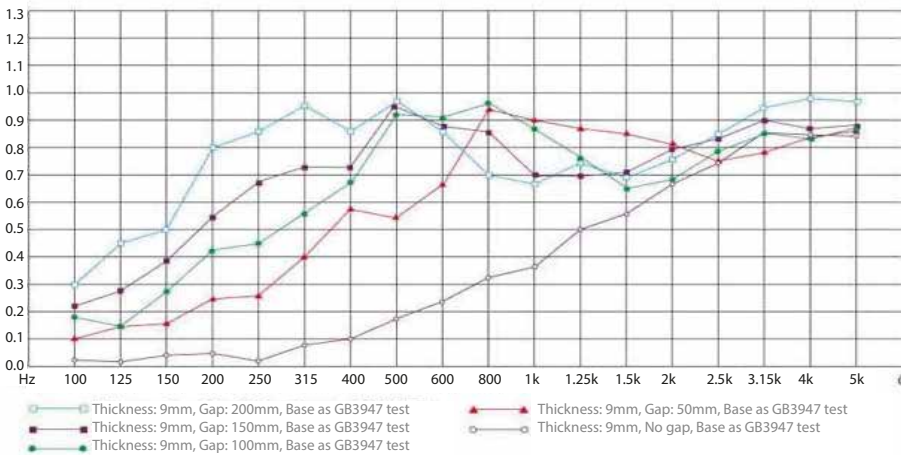

SIZE: Standard: 9mm x 1200 x 2400

Composition PET (MIN 50% recycled)

Panel Dimensions 2400mm (1/3mm)
x 1200mm (1/3mm)

Weight 1425g/m2 ≥95%
Thickness 24mm +/- 0.3mm

9mm NRC Test Acoustic Performance

SGS fire test in accordance with EN 13501-1:2018 (B)
SGS test report no. GZIN2005020858CM, May 28, 2020
SGS fire test according to ASTM E84-13A class A
SGS test report SDHG1309008105F
